

In The Abstract:

Please add the Abstract as follows:

An article movement device for use in a storage area including guide means to define a path for movement of articles, the guide means positioned on or supported by at least one surface of the storage area. Articles which are positioned towards the rear of the storage area are moved either by manual application of force to the articles, the device, or by powered movement, towards the front of the storage area for viewing and/or access and so on for all the articles held by the device.
